ANNUAL REPORT 2020

Port de Barcelona

Letter from the President's Office

The Port of Barcelona 2020 annual report is without a doubt a reflection of a year that has upended the world order. 2020 has been a particularly difficult year, both for international trade and for the economy and society as a whole. The Port of Barcelona has been no less affected by these difficulties and has mirrored the economic situation generated by the COVID-19 pandemic.

Since the beginning of the pandemic, we have stood by our Port Community, taking decisive measures to soften the blow. Two days before the start of the official lockdown, we announced the first financial aid measures prioritising companies' ability to keep running. Then we brought in further economic measures, and by the end of the year we had lent clear support to the industrial sectors, both to our concessionaires and to our customers and the companies that operate every day in the Port of Barcelona.

All of us at the Port of Barcelona are aware that we are an essential economic driver. Our mission is to generate prosperity in our community, while increasing the competitiveness of our customers by providing efficient and sustainable logistics and transport services. That is why we help the business community and, ultimately, society as a whole with our contribution to economic recovery to help us all out of the current situation as quickly as possible.

The staff of the Port of Barcelona worked during the year to continue with our social sustainability and environmental sustainability projects, because at the Port of Barcelona we are fully aligned with the United Nations Sustainable Development Goals (SDGs) with a series of actions underway, as you can see in this 2020 Report.

The Port of Barcelona does not stop. Not even in the midst of a pandemic. In the most difficult times, we must move forward to meet our challenge and our commitment to society.

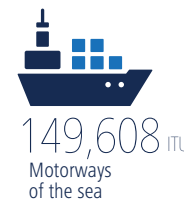

Key data 2020
